

Introducing the VEB 604-S, a sophisticated device designed to extract four channels of audio from the network and seamlessly convert them back to analog audio. This versatile unit facilitates the integration of audio into AEX SYSTEM'S diverse range of power amplifier models, providing a comprehensive audio solution. Notably, each of the four channels on the unit is equipped with a unique IP address, offering users the flexibility to receive dedicated audio from their desired sources.

What sets the VEB 604-S apart is its individualized control features. Users can remotely control the gain settings for each channel with precision, thanks to the intuitive Network System Manager accessible via the network. This level of control ensures a tailored and optimized audio experience, adapting to specific sources and preferences. The VEB 604-S stands as an advanced solution, allowing users to effortlessly manage multiple audio channels while maintaining optimal control and flexibility within their audio systems.

VEB 604-S
Technical Specification

	VEB 604-S
No. of Channels per unit	4 Channels
Line Out Audio Level	0 dBV (600Ω Balanced)
Audio Format	CD Quality BGM Audio Codec
Frequency Response	20Hz - 20kHz
Signal to Noise Ratio	>105dB
Total Harmonic Distortion	<0.05%
Network Interface	RJ 45,10/100 Mbps Ethernet TCP/IP
Indicators	Power, 1 nos. Analog Link & 4 nos. ATT OVR
Control Output	4 nos. ATT OVR & 4 nos. Control Output (user programmable)
Power Requirements	24Vdc (Regulated), 3.0A (Fuse:1.0A)
Material & Finish	Mild Steel Casing, Epoxy Coated Textured Black
Dimensions	483 x 44 x 150 mm (W x H x D)
Weight	3.0 kg
